

Electric Agitator on Pontoon

OVERVIEW

Efficiently homogenizes liquid manure contained in saucer-shaped pits.

Key Features

- Agitator of 3 feet (91.4 cm) long.
- Low profile design for maximum stability.
- Drive shaft with an anti-vibration bearing.
- Available motors: 7.5, 10, 15, 20, 25, 30 or 40 HP (5.5, 7.5, 11, 15, 18.5, 22 or 30 kW).
- 20" (508 mm) or 24" (610 mm) propeller.
- The agitator can be winched up for maintenance.
- Anti-slip galvanized steel deck.
- UV resistant foam filled, polyethylene float.
- Float overall dimensions: 7'-8" (2.3 m) wide by 12' (3.7 m) long.

Typical Application

Creates enough turbulence to keep the sediments in suspension and facilitate the emptying of the pit.
