

# MAGNUM MANURE TANK

The workhorse of the industry

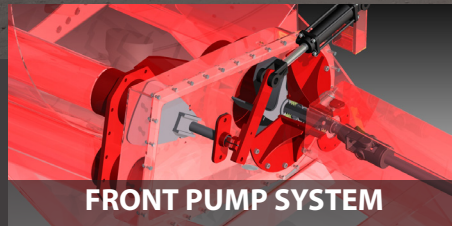

## STANDARD FEATURES

### LONG TONGUE

The tank design has a long tongue for better weight control and balance. Simple. Rugged. Reliable

### FRONT PUMP SYSTEM

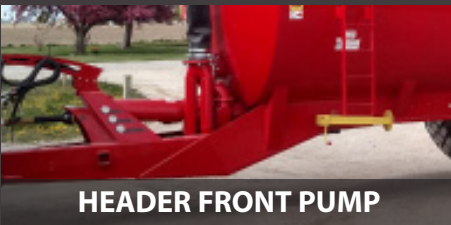

Allows for in-tank mixing without any moving parts, and provides a pressurized unloading system

### AVAILABLE CAPACITIES

Available in 1,900 - 9,000 US GAL Capacities. Injector & vacuum configurations available

## OPTIONAL FEATURES

### HEADER FRONT PUMP

Optional patented Header Series Front Pump System

### LARGE DIAMETER TIRES

Large diameter 35.5 x 32 tires for unbeatable flotation

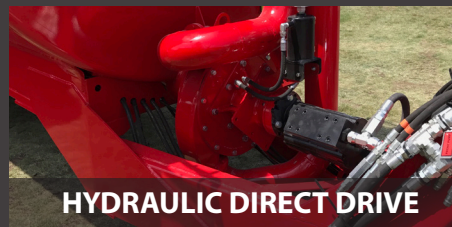

### OPTIONAL FENDERS

Optional full fenders with LED lights provide excellent visibility at night

### TOP LOAD TRANSFER BOOM

### HYDRAULIC DIRECT DRIVE

### WEIGHT TRANSFER KIT

## MAGNUM MANURE TANK

The workhorse of the industry

**TOP LOAD INJECTOR CONFIGURATION**  
WITH HEADER SERIES FRONT PUMP & 35.5 X 32 TIRES

### THE TANK

The 1/4" tank with unibody construction, solid welds inside and out, and full circle tensioned baffles are what makes Nuhn tanks unbeatable. The circular shaped tank keeps the center of gravity low, as opposed to a mushroom shaped tank with the center of gravity very high. The tank has a full light kit, with the lights to the outside of the tires and are designed to break away if they hit something. There is a large clean-out door at the rear of the tank. Nuhn Industries tanks have the strongest undercarriage in the industry, full length frame with cross members, in-tank spray wash system, and bearing positioned away from direct contact with manure.

**60' SPREAD PATTERN**
